BRIGHT TV VIEWERSHIP ANALYSIS

Presented By : Mbali Mkhwanazi

User Behaviour and Engagement Insights

PROJECT OBJECTIVE

This project analyses Bright TV's user and viewership data to identify viewing patterns, understand audience demographics, and uncover key trends. The goal is to generate insights that support better content scheduling, targeted marketing, and improved viewer engagement.

CONTENT:

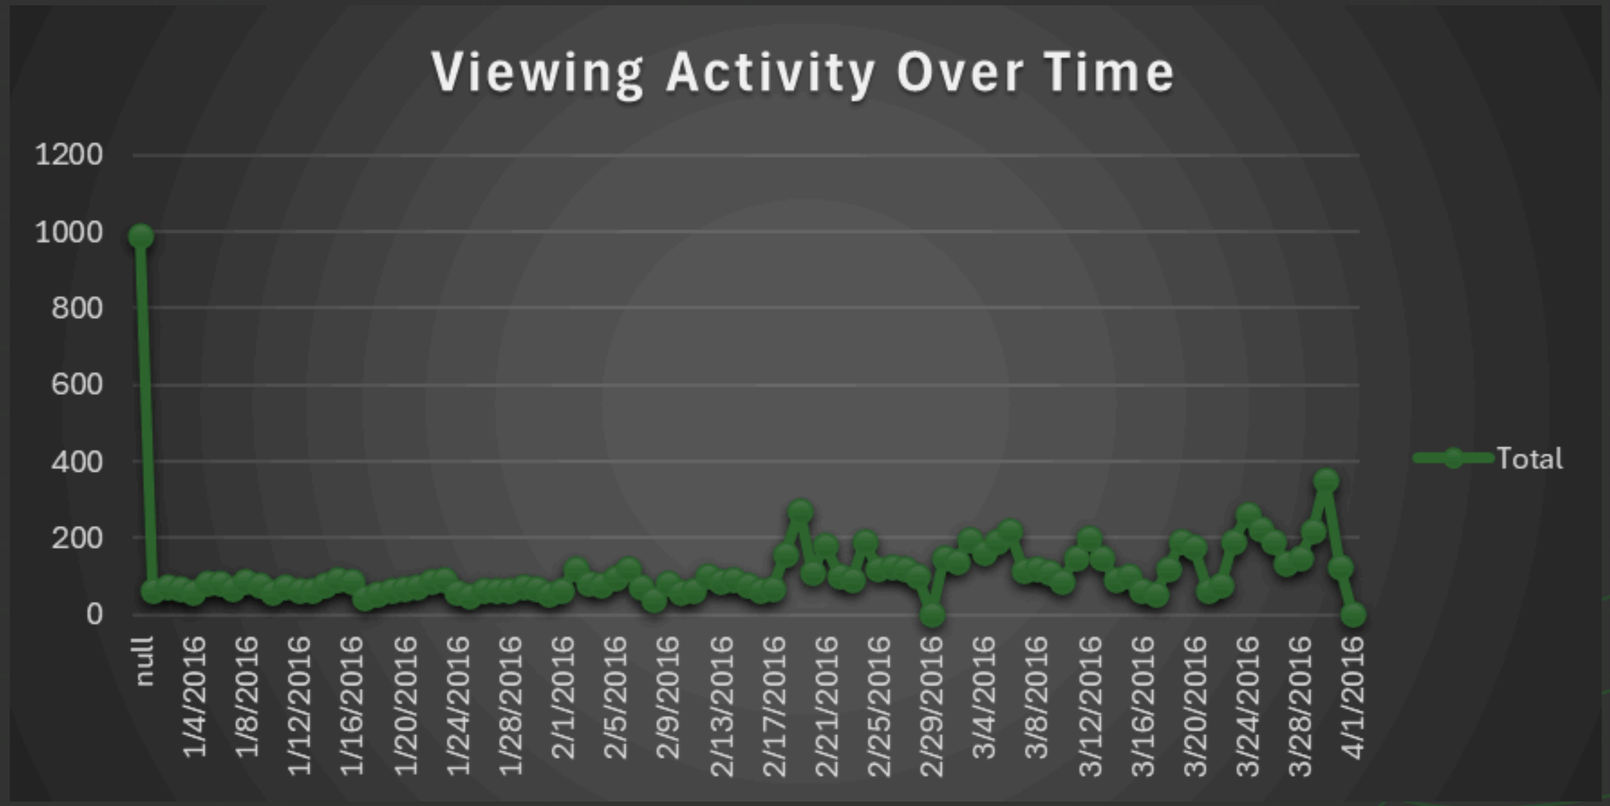
- Analyse user viewership behaviour
- Identify trends in content consumption
- Understand demographic and geographic patterns
- Provide insights for business decision making

VIEWING ACTIVITY OVER TIME

This line chart shows how viewership changes over time. It indicates varying user over time. Between the 4th of Jan to the 17th of Febthere wasn't much viewership difference. Much changes in viewership started after the 17th of Feb.

RECOMMENDATION:

Identify high traffic periods and schedule premium content during those times

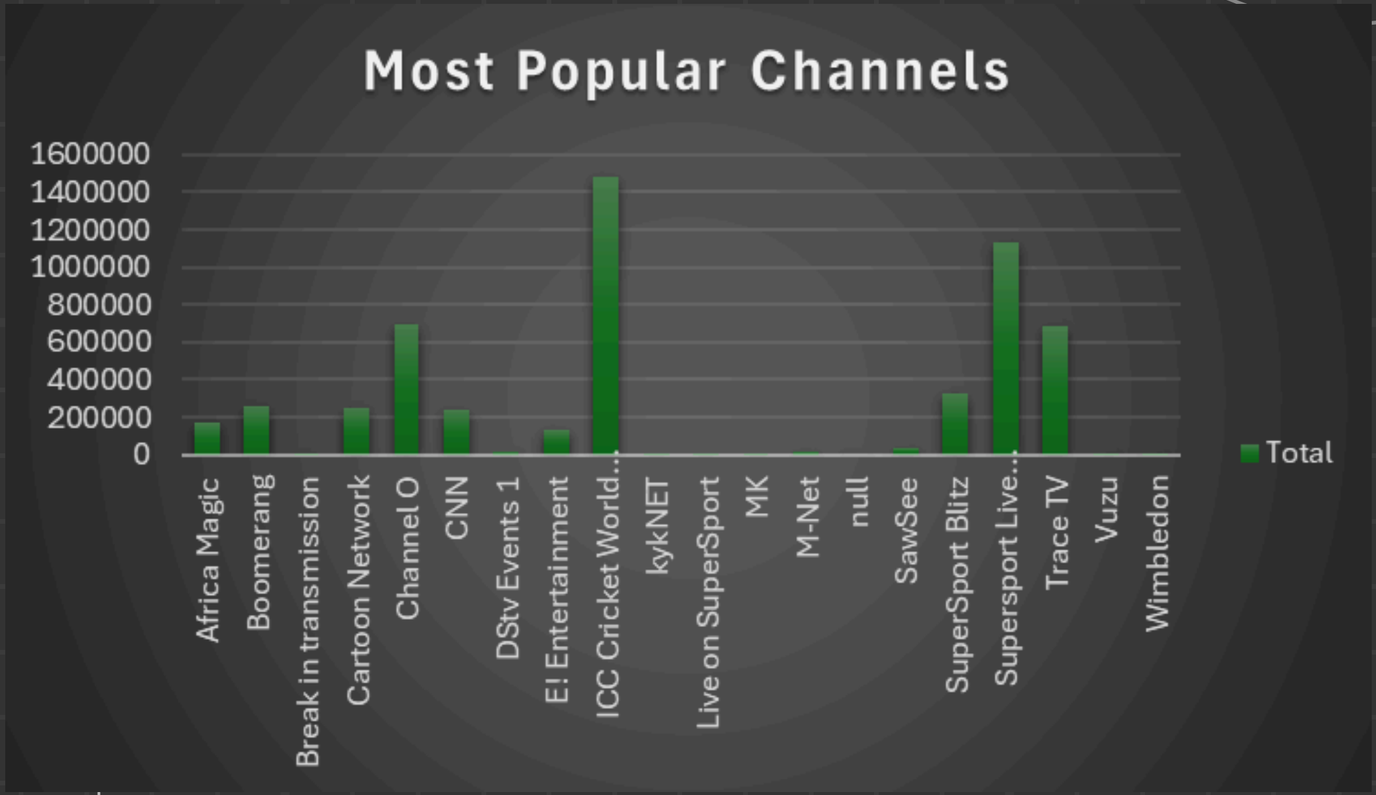


MOST POPULAR CHANNELS

In this bar chart we get to see which channels are the most popular and which are the least popular. We get this insight using the amount of time that channel was watched. Certain channels dominate in total watch time, showing strong viewer preference.

- ICC Cricket World Cup 2011 (Most Popular)
- Wimbledon (Least popular)

Recommendation:
Focus content investment and advertising on high performing channels.



PEAK VIEWING TIME

This bar chart is used to show around what time people view more or less. According to the graph, low viewing time is around 0(12 am) to 4 am then start increasing from then.

HIGHEST VIEWING TIME:

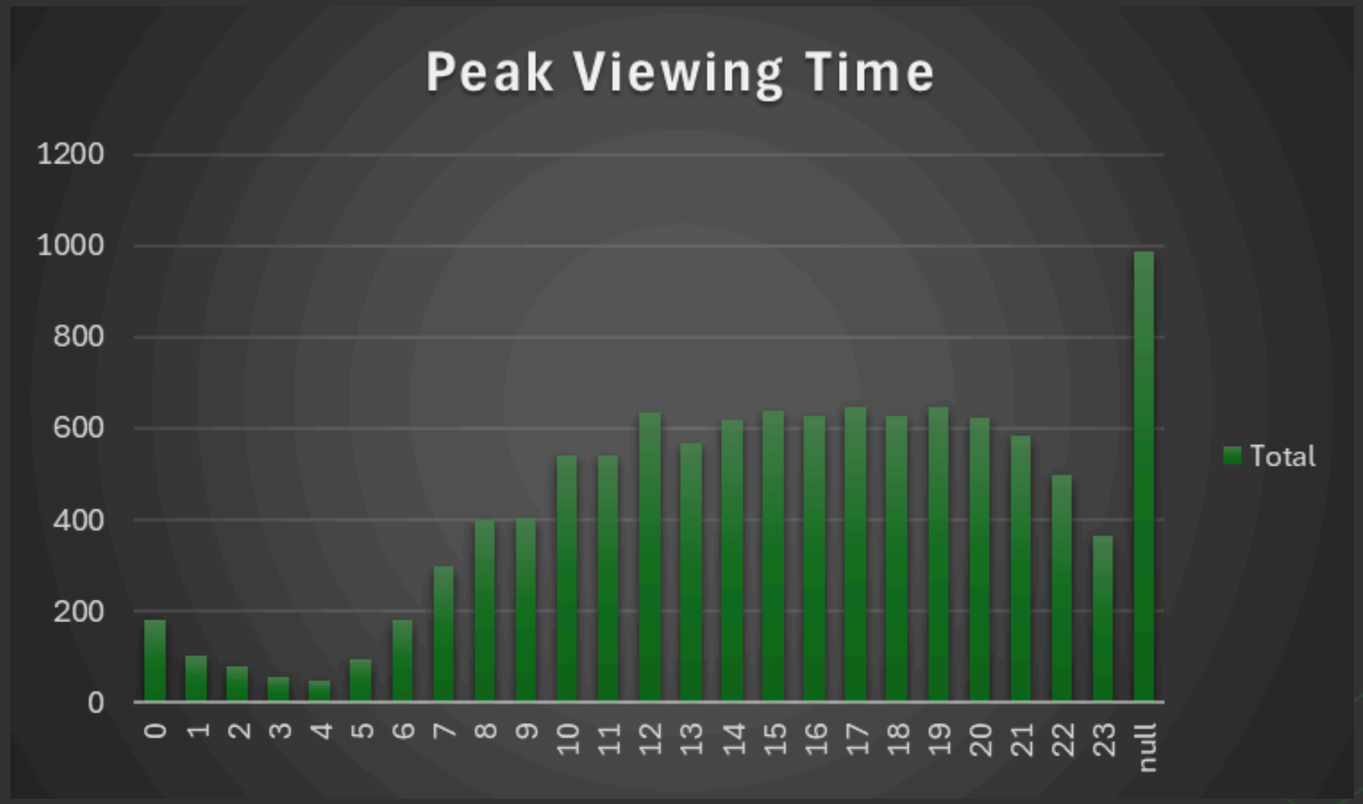
12 PM

LOWEST VIEWING TIME:

5 AM

RECOMMEDATION

Schedule high value content during peak hours to maximize reach



GENDER DISTRIBUTION OF VIEWERSHIP

The following pie chart shows the gender distribution of viewership in percentage. The males dominate viewership, which indicates there is skewed engagement.

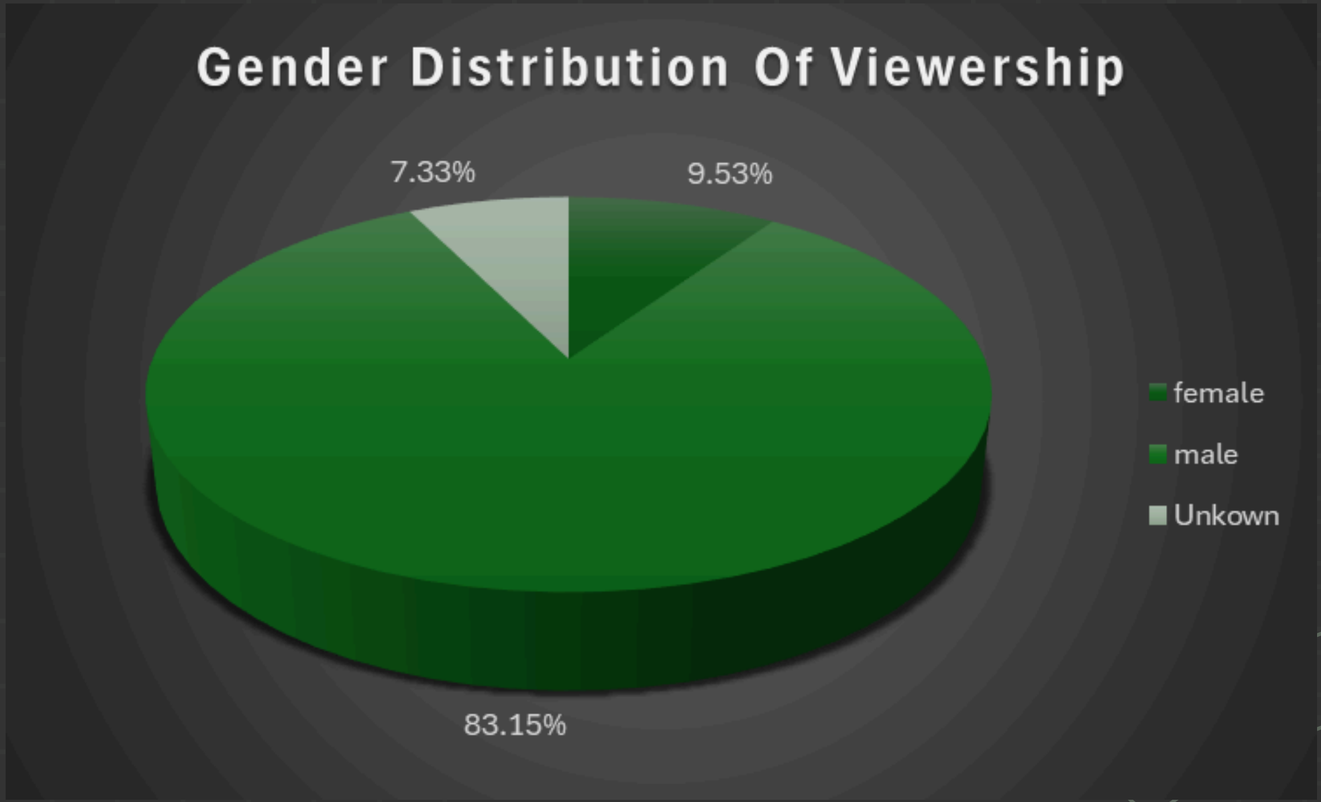
83.15%
MALE

9.53%
FEMALE

7.33%
UNKOWN

RECOMMENDATION

Tailor content strategies to balance engagement across demographics

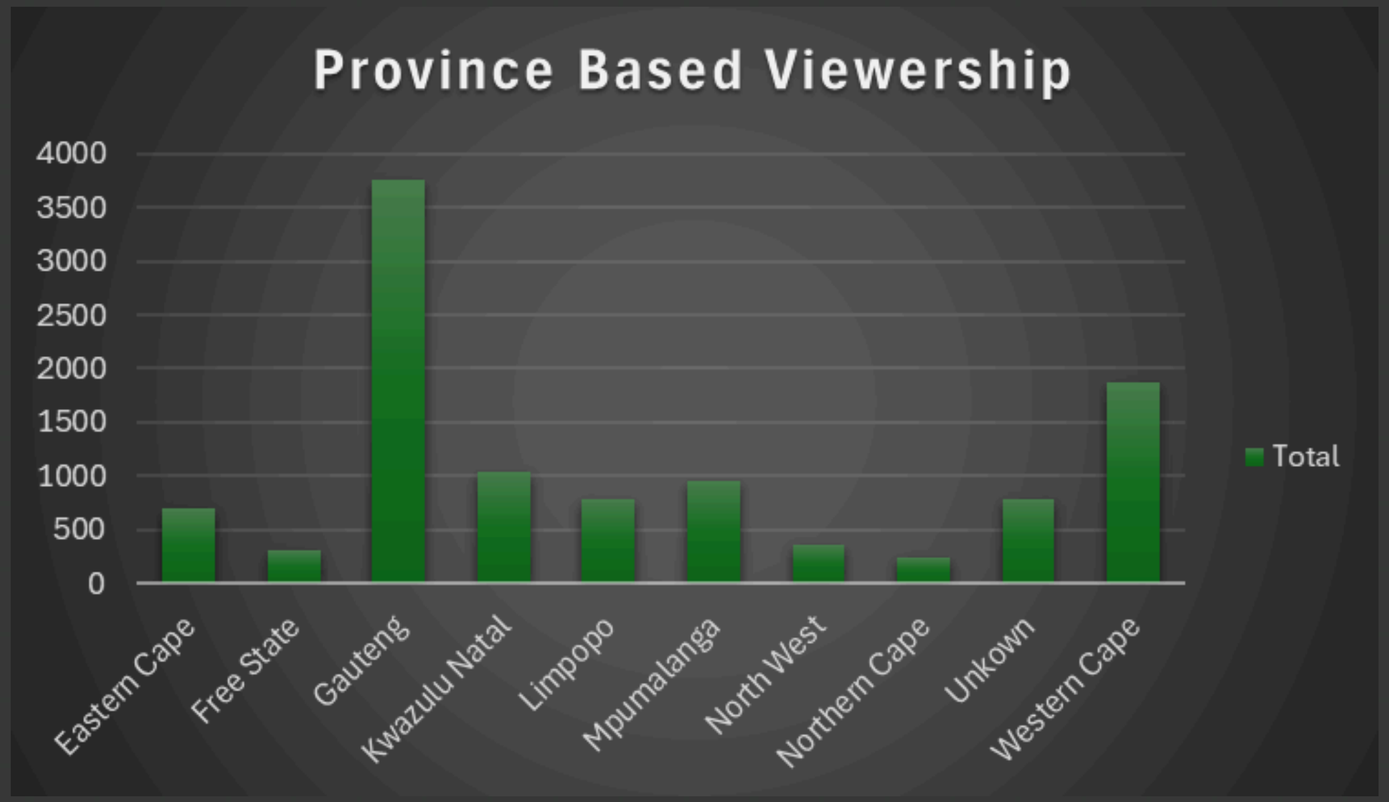


PROVINCE BASED VIEWERSHIP

Shows geographic distribution of viewers. Gauteng leads significantly, acting as a major engagement hub. Northern Cape is the lowest.

RECOMMENDATION:

Prioritise marketing and infrastructure in high performing regions



KEY INSIGHTS SUMMARY

- Peak viewing occurs in the meeting
- Certain channels dominate engagement
- Gauteng is the highest contributor
- Viewer behaviour varies across demographics

THANK YOU VERY MUCH

- Data driven decisions can improve engagement
- Targeted content strategy is essential
- Understanding user behaviour enhances performance
